

JUAN SAMAYOA

AUTOMATED QA | QA ENGINEER

☎ +502 5034-2840 ✉ juansamayoa17@outlook.es

📍 Zone 18, Ciudad de Guatemala

QA Engineer with over 4 years of experience in software quality assurance, specializing in functional testing, API testing, and enterprise and banking systems validation. Experienced in test case design and execution, workflow automation with Postman Flows, data validation using SQL Server and Sybase, log analysis, and defect management. Knowledgeable in Java and Angular, enabling effective collaboration with development teams and providing a comprehensive view of the software development lifecycle. Bilingual Spanish-English professional, oriented toward continuous improvement and delivering high-quality solutions.

ABOUT ME

WORK EXPERIENCE

Automated QA

Business Development Group, S.A. | March 2026 - Currently

- Executed functional, integration, regression, and E2E validation tests on digital banking applications and services.
- Designed and executed test cases and scripts to ensure compliance with functional and business requirements.
- Performed REST API testing, data validation using SQL Server and Sybase, and log analysis for issue identification and tracking.
- Prepared QA documentation, test evidence, and defect reports, collaborating with cross-functional teams under Agile methodologies.

IT Testing Engineer I

Conduent Business Services de Guatemala, S.A. | October 2024 - March 2026

- Optimized Oracle SQL query generation, resulting in a 50% reduction in future testing time for similar scenarios.
- Developed and executed over 50 test cases for pharmaceutical clients, contributing to a 40% decrease in post-implementation defects.
- Performed quality control on more than 20 client reporting dashboards, ensuring data accuracy and improving decision-making efficiency by 15%.
- Carried out validation processes to ensure database data integrity, leading to a 10% reduction in data inconsistencies.
- Executed thorough manual testing on new features, identifying an average of 3 critical defects per development cycle.

Specialized QA Analyst

Banco Industrial, S.A. | July 2022 - October 2024

- Led the successful implementation and execution of the first automated test in Postman Flows, reducing API validation time by 30%.
- Performed manual testing (black-box, white-box, smoke) across more than 10 banking applications, detecting and documenting an average of 8 defects per project.
- Designed and created over 150 test scripts and detailed scenarios, increasing overall test coverage by 30% and achieving 100% coverage in certification testing.
- Identified and collaborated on resolving application bugs, contributing to a 15% reduction in user-reported incidents.
- Ensured quality and functionality across banking applications, achieving a 95% compliance rate with functional requirements.
- Conducted business requirement analysis, facilitating the translation of user needs into technical specifications and reducing misunderstandings by 10%.

Customer Resolution Expert (T-Mobile)

Alorica Comunicaciones Limitada | May 2022 - July 2022

- Provided critical support to the operations team, managing and resolving an average of 10–15 daily escalations.
- Generated daily, weekly, and monthly performance reports for management, facilitating data-driven decision-making and improving operational efficiency by 10%.
- Resolved complex customer issues, maintaining an 85% customer satisfaction rate.
- Managed the dispatch of an average of 12 invoices, contracts, and orders to clients daily, ensuring accuracy and timely delivery.
- Identified and implemented operational process improvements, resulting in a 10% reduction in processing time for routine tasks.

Customer Service Representative (T-Mobile)

Alorica Comunicaciones Limitada | Abril 2021 - Mayo 2022

- Provided assistance and technical support to over 50 T-Mobile customers daily, maintaining high efficiency and an 87% NPS.
- Resolved an average of 90% of product and service-related inquiries and issues on the first call.
- Handled complaints and claims with empathy, achieving an 85% satisfactory resolution and customer retention rate.
- Educated customers on mobile device and application usage, reducing repeat support requests by 20%.

EDUCATION

Universidad Mariano Gálvez de Guatemala

Information Systems Engineering and Computer Science
2023 - Actualidad

Colegio Montano Portal Los Alámos

High School Diploma in Science and Letters with a Computer Science Emphasis
2016 - 2017

TECHNICAL SKILLS

- **Test Automation:** Postman Flows, SOAP UI, Selenium, Git.
 - **Programming Languages:** Python, Java, JavaScript/TypeScript.
 - **Frontend Frameworks:** Angular.
 - **Databases:** SQL (Oracle), PostgreSQL, SQL Server.
 - **QA Concepts:** Test Case Design & Execution, Manual Testing (Black-Box, White-Box, Smoke), Business Requirements Analysis, CI/CD, SDLC, Agile Methodologies (Scrum).
 - **Other Tools:** Postman, GitHub, Office, Jira, Azure DevOps, AWS CloudWatch, AWS S3, Linux CLI.
-

SOFT SKILLS

- Effective Communication
- Time Management
- Fast Learner
- Responsibility
- Problem Solving
- Attention to Detail
- Adaptability
- Results-Oriented Agility
- Continuous Learning
- Teamwork

LANGUAGES **English:** Professional (B2)
